

HORSE STENCIL p.1

INSTRUCTIONS

- 1) Print out all 8 pages
- 2) Line the pages up, and with a pen, draw in the missing sections of the horse that weren't printed because they were too close to the margins
- 3) Cut out the horse along the dotted lines on each page. Discard the shaded parts.
- 4) Use the colored rectangles to help you line up the horse stencil. Tape the pages together making sure to cover all seams with tape.
- 5) Position the final stencil over 4 16" X 20" canvases. To get the horse centered on the canvases, you should position the stencil a little off center to the left. It helps to tape just inside the edges of your stencil down with small loops of masking tape.
- 6) Spray paint in a well ventilated area.
